

Block 27 New Community Secondary Plan

Project:

New Community Secondary Plan

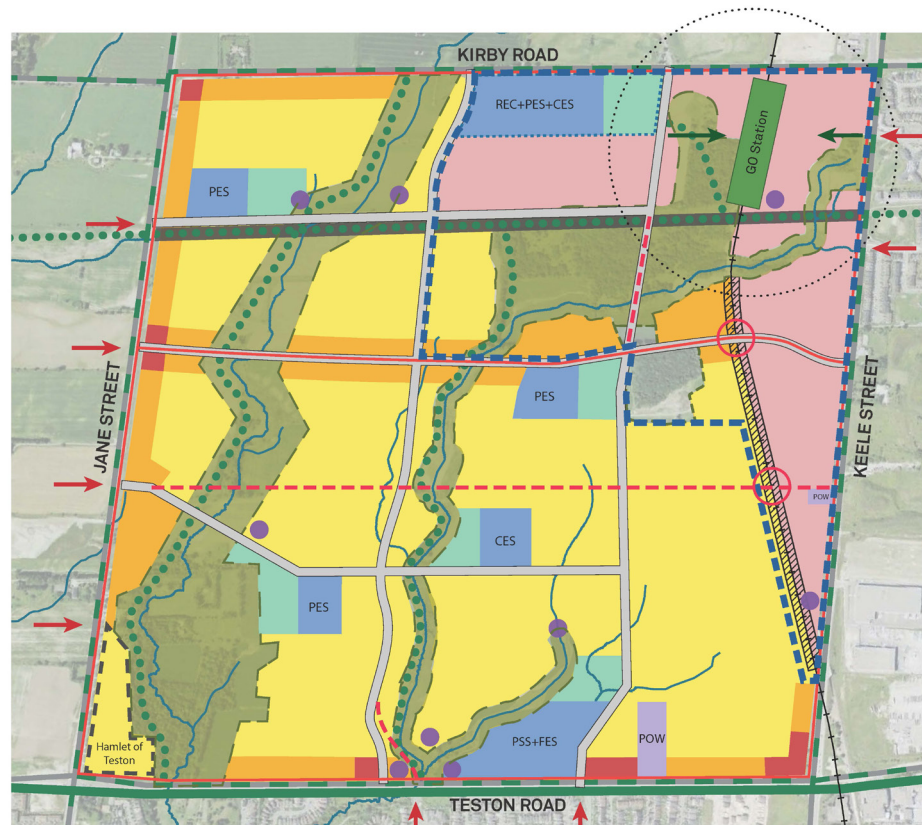

Client:

City of Vaughan, Ontario

MSH Genuine Results

The development of the Block 27 Secondary Plan builds on the City of Vaughan’s 2010 Official Plan and the results of a Subwatershed Study which includes the Secondary Plan Area. It also reflects extensive evaluation and development of a natural heritage network and a coordinated plan for the delivery of infrastructure, community services and urban design. In addition, the work on the Secondary Plan is being coordinated with the North Vaughan and New Communities Transportation Master Plan being carried out for the City by a transportation consultant.

The development of the Secondary Plan includes extensive public involvement including a Public Visioning Session. The vision and principles developed through that session have formed the basis, together with the extensive background technical studies, for the Emerging Land Use Concept which has been endorsed by the City as a basis for the Secondary Plan. A Community Energy Plan is being prepared as part of the sustainable planning framework.
